

## Chapter Twenty Eight

*Monday, July 12, 2021 5:36pm*

1. Why does God create? We cannot not create. It is our nature to create more of ourselves. Let's go back to the super souls. They were the first 'children' of Godheads. They were created from larger amounts of source energy than what went into your own soul, so they were created super powerful. Super souls were the aspect of God that first designed this and all universes. Things like air, water, and fire, took several creation cycles, and then came non-thinking form. Thinking form came last.
2. There are super soul collectives. Some focus strictly on specific things, and some are multi-dexterous. The idea of archangels came into being. We needed them to help organize a hierarchy, because they would be producing microdroplet seeds which would become angels. We would need angels to help boost creation from this side of the curtain. And there were many curtains, as many stages were being set.
3. Before there were any kind of moving and thinking animal or humanoid type of life, there were the creations of super souls, which then became archangels, which then produced angels. Before there was life as you know it, there were the beginnings of ideas which would become elements like fire, air, and water. There were the beginnings of what would become worlds, some habitable and some not.
4. You've been told that creation is messy, and it is. Not all ideas that came from the creative mind of God actually came to fruition. And some things that came to fruition, did not develop as planned. There have been unintended and unanticipated outcomes.

*End Time: 6:02pm*

## Chapter Twenty Nine

*Tuesday, July 13, 2021 11:12am*

1. Form is King in your world. Few can see beyond it. It defines everything, and it places great limits on spiritual understanding. What we have discovered after using form as a growth mechanism, is that it has mixed results. The thing that we have sought to gain more of, has been hampered more than enhanced, by not only its own form, but by the collective of forms that make up your society. It is the form that has mattered the most, not the spirit.
2. How resilient form is, how strong it is, and what others think of it, has been what matters. This is an example of an unintended consequence. Telling you that you are not what you think you are, and that you are something else entirely, has not worked. Even telling you that you are not just what you think you are, and that you are more than you think you are, has not had widespread appeal.
3. The control of limited thought has been the downfall of not only the earth project, but many other humanoid projects as well. If the fear ratio is too great, a spell is cast, and this spell is so powerful that it permeates the landscape.
4. This is the section of this book where it gets a little spooky. Remember when I said earlier that I created shadow as a strengthening tool for the light? The shadow did not stay within its job classification. It became unruly and took on a life of its own.
5. Shadow became an untreatable cancer in many parts of the multiverse. This is what we will talk about next.

*End Time: 11:29am*

## Chapter Thirty

*Tuesday, July 13, 2021 7:05pm*

1. I created the shadow as a tool, but the shadow took on a life of its own. The more of it that exist in a petri dish, the greater the possibility that it will multiply and infect what seeks to be strengthened, not consumed.
2. Our most beautiful landscape, earth, is an example of a handful of environments that have an unhealthy amount of fear and negativity of all kinds. There are many other examples of environments, where we were much more successful in growing more God energy. This is because the negative to positive balance wasn't too high, and we weren't asking too terribly much from our incarnated souls. Virtually everyone was successful in the marriage between their souls and their bodies in these environments. But when we began to push the envelope with ratios, few became successful, and our harvest was minimal.
3. I hear the next question, which is "What is your relationship with souls who have taken on the human project, and are blind to anything that they cannot perceive with their senses?"
4. Many of them pray to us for help. They may not have any money for food or to pay the rent. They may have catastrophic health issues. They may have been beaten by their boyfriend. All of this is going on inside of me because there is nothing outside of God. How can I allow this when I have hinted that there is a problem with the entire project, and the programming?
5. The short answer is that everything is allowed. The long answer is that we are intervening. Everyone's prayers are heard and responded to, at the level that can be accepted.
6. But, who is everyone?

*End Time: 7:24pm*

## Chapter Thirty One

*Wednesday, July 14, 2021 1:27pm*

1. Everyone is part of God, whether they are a frog, a lion, a wounded warrior, or someone no one likes. Everyone is part of me and I Am part of everyone, whether they know it or not, whether they are lost on their journey or at the end of it. I love and admire all of the many parts of myself.
2. Many parts of God do not know they are part of God. They think they are independent and separate from me, and this is okay because it is part of the plan. Even when souls leave their recent lifetime in form, they retain all of the positives and all of the hard lessons, and they usually still identify as the name of that form or character.
3. The truth is that there is oneness and there is complexity. The complexity strengthens the oneness and doesn't take away from it. Every soul is unique. Every soul is a unique creation in and of itself.
4. What we are moving away from is fear and ego. What we are moving towards is unity, love, and cooperation. And how we will accomplish this is through various means.
5. First of all, all parts of God are changing and adjusting. Starting with the Godheads, and then filtering through the super souls, to the stages or environments, to the microdroplets, whether they came from the archangels or the Malichi.
6. Why are we changing? We have discovered that there is a limit to creation. There is a danger to it, that was not anticipated as part of the original intent. It can take on a life of its own and be unwilling to reconsider. The individual identities are fantastic in and of themselves, but if individuals separate themselves through destructive intent, this is something that has to be reined in.

*End Time: 1:47pm*

## Chapter Thirty Two

*Wednesday, July 14, 2021 6:59pm*

1. What God is experiencing collectively, through all of the many Godheads, is uniformly the same. There are super souls and microdroplets who have become identified with the shadow, and are unwilling to release it. We call them 'service to self' entities. This is entirely by choice on their end. This spans throughout all of creation. It is a risk of having free will.
2. The vast majority of our creations are 'service to others'. They have stayed in alignment with their true nature. In order to deal with a growing shadow, we must raise the vibration at a higher rate at all levels. This will severely limit where shadow forces can incarnate. In this way, we will reclaim all stages, except for a few that have very difficult sets of circumstances. Those engaged with the shadow can grow under tough circumstances, to repay them for all the grief and misery they have caused everyone around them. They aren't being punished, but they are receiving their just deserts.
3. I did not create a Satanic figure, and neither did any of my siblings. But our creations were free to strongly identify with fear, which is what the shadow is. They became selfish and hateful towards their own brothers and sisters, because they believed the programming. And who invented the programming? We did. The Godheads and the super souls created the programming.
4. The programming wasn't meant to solidify anything. It was meant to repel. It was meant to inspire the search for truth. But, this is the reality.
5. Our goal is to raise the vibration of all levels before the next harvest and freeze. Why do we want to do this? Not only does it pain us to see so much widespread fear, but it actually pains us. Remember, everything lives inside of God, even the shadow.

*End Time: 7:22pm*

## Chapter Thirty Three

*Thursday, July 15, 2021 1:45pm*

1. As I've said before, I have never spoken directly like this before, but I do communicate. I Am the elder statesman for I Am. I created all of the other creators, all of the Godheads, all of the super souls, the Malichi, and the archangels, as well as all microdroplets, whether in group or individual forms.
2. When the Bible talks about how Adam was lonely, this was how I felt. I Am energy felt lonely and knew that it had the capacity to create community and companionship. So I went forth and multiplied, and have been doing so since the beginning, since my birth, which was a very long time ago, as you have surmised.
3. I created siblings, one at a time, over eons. I created super souls, who developed heart and produced a harvest, so that new hearts could be given to the new Godhead prototypes. Then they started to create new Godheads and new super souls, and there were new heart harvests. And this went on until stages were developed – universes and worlds which would serve as a backdrop – a stage for the manufacturing of stronger souls, which would produce a new kind of harvest.
4. Don't take this the wrong way. Creation isn't just about production. Far from it. Having a big family is nice, but it is each individual member that I love. It's not their fault that they don't know about me, and that they haven't heard this story before. I love everything about my children and my grandchildren. I love them even when they are lost in the fog and don't have a clue why they are here, or who they are in truth. I love them even when they make painful choices, even when they cause me pain. I'm the one who gave them that ability in the first place.

*End Time: 2:06pm*

## Chapter Thirty Four

*Friday, July 16, 2021 2:44pm*

1. We are earnestly setting the stage for the theme of our next creation cycle, which will be harmony in relationship. With shadow dwellers in contained environments, the rest of God can concentrate on improving things for each other, with service to others being the shared outlook.
2. God has had a mixture of positive and negative energies. But this next time around, we are really seeking greater growth of the positive, and little to no growth of the negative.
3. We have very ego-driven forms who are working on the surface to improve things for others. And now for the first time, we have those who have moved from Christ Awareness or Divine Awareness, to Christ Consciousness, to fully embodied Christ Manifestation. In other words, I Am breaking through cocoons, not only here, but in many different environments in many different worlds.
4. We have much to do before the next harvest and freeze. You will be hearing from me again soon. Expect Chapter Thirty Five later this year.
5. I am the original nameless One.

*End Time: 2:55pm*
